

Briefing on Kuching Urban Transportation System (KUTS)

The Kuching Urban Transportation System (KUTS) is a visionary transportation using Automated Rapid Transit (ART) System. It is the 1st system in the world powered by hydrogen fuel cells and run on virtual tracks. The 1st phase of KUTS involves the construction of two urban lines namely the Samarahan Line and Serian Line. The whole project is expected to be fully completed by 2027. Once it is completed, the KUTS is expected to ease the traffic congestion in the Greater Kuching area, create more economic opportunities, promote green energy technology and greater mobility for the people. To know more about the KUTS, please visit Sarawak Metro's website at mysarawakmetro.com.
